Subject: ECE Staggered Start 2019-20

Good Evening ECE Principals,

As some of you may know, ECE Staggered Start in CCS has been a past practice. However, based on our professional development licensing requirements and scheduling, the Division of ECE has had moved away from this practice over the past few years.

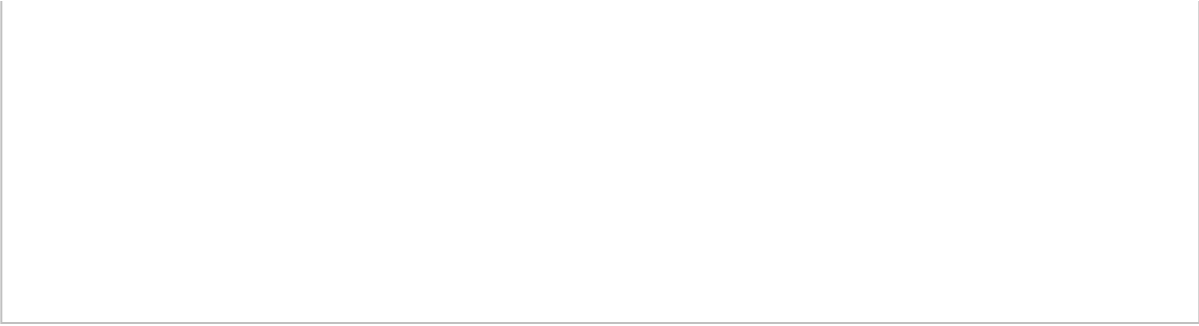

With consideration given to Pre-K licensing requirements and feedback from our ECE teachers, we have created two Staggered Start options for the 2019-20 school year. The **Staggered Start days are September 3rd and 4th, 2019.**

During our professional development day today, we discussed the two options available for the teachers and have mandated they work collaboratively with you to identify the best option for your building community. Once a building decision is made, the teachers will respond to the department via a survey in order for the Division of ECE to capture and support the approved building plans.

The information provided to our teachers is below for your review.

Just to confirm, the **official first day of ECE student attendance is September 5, 2019** with transportation for students with disabilities also beginning on this day. Please note these days should not be used by staff to conduct home visits or off site family and community activities. These days are provided for students and families to access the building. Thank you!

Please let us know if you have any questions or concerns. We are very excited for our youngest learners, families and staff to have this opportunity again for a great start in CCS!

Ann
